Edward Đỗ
Software Developer

As a passion-driven individual, I'm constantly striving to find myself in the most opportune environment to maximise my potential as a developer. My dream is to be in a role that offers the responsibilities needed for continuous development, with a company that values my growth as much as I do. My #1 bucket list goal is to eventually be in said position as a digital nomad, combining my two biggest passions in programming and travel, achieving peak life fulfilment.

- Express
- MongoDB
- Ruby on Rails
- SQL - GraphQL, PostgreSQL
- Firebase

Misc.
- Git - GitHub, BitBucket
- Test Driven Development
- Unit Testing - Mocha, Jest, RSpec
- Object Oriented Programming

Work experience

November 2022 - March 2023
LEAP Legal Software Front-End Developer
JavaScript (ES6) • Vue/Nuxt • Storybook • Storyblok • HTML5 • SCSS
One of two developers on the global marketing team, I am part of the team responsible for the development and maintenance of LEAP's domains. We employ a strong focus on component reusability, using isolated components driven development through the development of our UI component library based on our design system, and having everything passed to a headless CMS for easy access to our designers.

March - June 2022
Park Hyatt Events Management
This prestigious establishment gave me the opportunity to serve at the highest levels of hospitality. A 5 star fine dining experience, I had to work under the highest standards and thrive under the pressure of management, as well as clients.

July 2022 - December 2021
Amazon Warehouse Logistics
Behind the scenes of the largest e-commerce company in the world, working at the Amazon warehouse fulfilling logistics duties taught me the ins and outs of how the e-commerce industry operates.

Portfolio

March 2023 - ongoing
wizzy wig
TypeScript, React, Redux, Material UI
repo | site
An in browser markdown note-taking web app with code block syntax highlighting, a file system, and tab management. Currently a frontend demo. Heavily inspired by Obsidian.

September 2022
tonguist
React, Node, Express, MongoDB, Material UI
repo
A flashcards web app centred around language learning that dynamically tracks daily and weekly progress through intuitive visual cues. A clone of Lingvist.

August 2022
Brain Train
React, Firebase, Bootstrap
repo
A collection of highly interactive brain trainer games made straight out of state management and DOM elements. Akin to humanbenchmark.com

July 2022
ana
Ruby on Rails, PostgreSQL
repo
A forum board built with Ruby on Rails that deals with complex handlings of its database. This site deals with several many-to-many associations and different ways of sorting data.
